

Plush planets!

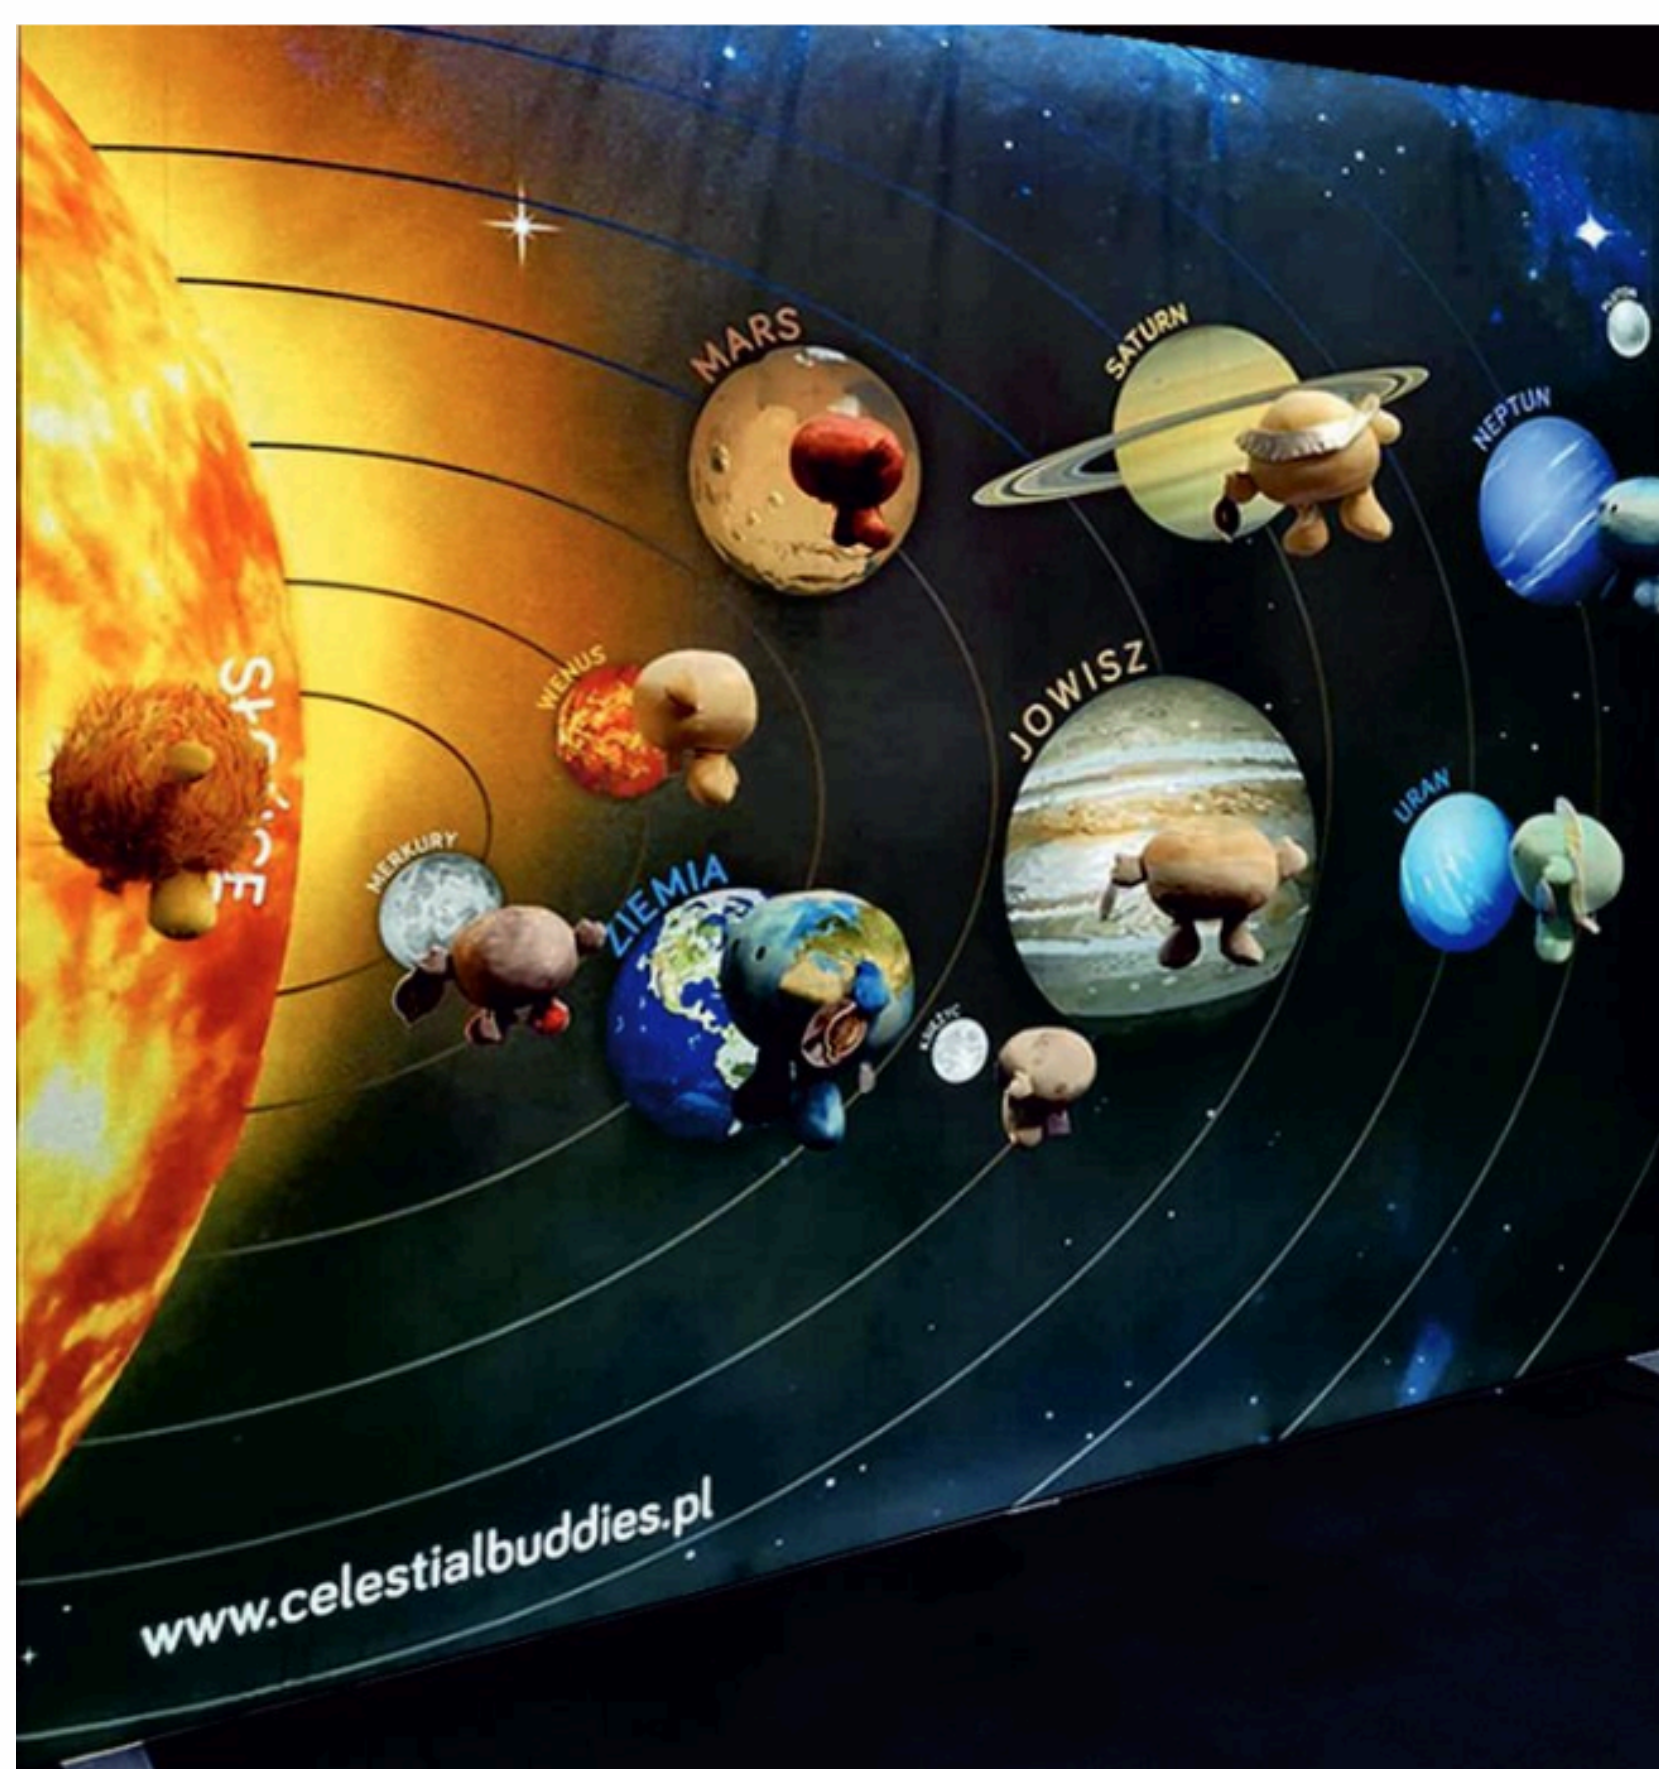

Space companions for kids!

The Celestial Buddies plush planets collection is an original line of plush characters, each personifying a celestial body that inhabits our skies.

The "Big Bang" moment for Celestial Buddies planets came after the creator of this miniature stuffed universe saw a documentary series about the Solar System and realized there were no such plush toys.

Celestial Buddies is an adorable collection of plush cuddly toys inspired by planets and other cosmic bodies. Each of these soft

companions is not only adorable, but also educational, helping children and adults discover the mysteries of the cosmos in a friendly and fun way. We would like to highlight this collection as a great opportunity to explore the planets, the universe, and cosmic mysteries. Our Celestial Buddies plush toys are the perfect tools to get children interested in cosmic mysteries, helping them develop an interest in astronomy in a fun and educational way.

Get to know them

Each Celestial Buddies Plush Planet is carefully designed to reflect the unique features and characteristics of real celestial objects. With them, you can cuddle up with Jupiter and its Great Red Spot, marvel at Saturn's rings, or explore the surface of Mars—all without leaving your room.

Celestial Buddies not only bring the joy of cuddling but also teach about our incredible cosmos. Each toy is described in a fun way, including interesting facts and tidbits about the planet it represents. It's a perfect way to spark a passion for learning about space in young minds, as well as to deepen knowledge of cosmic topics at any age.
