

Portable night lamp

# Cube B™

**Portable glowing night lamp that's winning the hearts of children and parents around the world.**

We're delighted to introduce Cube B™ – a portable glowing night lamp that redefines the way we think about lighting in a child's room. It's not just a lamp – it's a companion for peaceful nights, a source of warmth, safety, and gentle light that helps little ones fall asleep feeling calm and comfortable.

## Who are we?

Marko – experts with 34 years of experience in distributing toys for children and beyond, whose mission is to support the development of the youngest by providing products that combine top quality with pure joy.

**Light that soothes. Design that inspires.**

In a world where parents are increasingly looking for products that combine functionality, design, and sustainability, Cube B™ stands out with its simplicity and ingenuity.

# Cube B™

**Gentle light that calms the senses**

Just one touch to brighten your child's world

**Cube B™** was designed with modern families in mind — those who value safety, aesthetics, and functionality. Its minimalist form hides thoughtful technology: a touch sensor that allows easy color and brightness adjustment, a light sensor that automatically reacts to the surroundings, and a 30-minute timer that turns the lamp off once the child is asleep.

-  The Cube B lamp consists of two parts
-  Power ON/OFF button
-  Automatic light sensor
-  Adjustable LED color and brightness
-  Socket wireless charging
-  Wall-mounted lighting option
-  Portable night lamp
-  Safe materials – 30% recycled

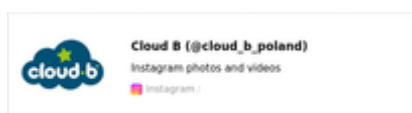

**Thanks to its two-part design, Cube B™ can be used in two ways:**

- as a wall lamp – simply plug it into the socket,
- or as a portable lamp – perfect for nighttime walks around the house or traveling with your child.

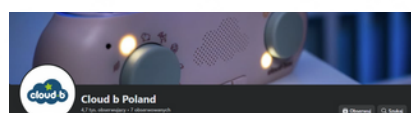

A practical and modern solution that blends functionality with emotional value — because every child deserves a peaceful night's sleep, and every parent deserves a moment of rest.
