

Cloud b® is a company specializing in creating innovative products for children that help them fall asleep and ensure a peaceful night's sleep. One of the main products of **Cloud b®** are projectors that create calming images and patterns on the ceiling and walls of children's rooms.

Cloud b® products combine light, colors, shapes, and movement to capture children's attention and direct their thoughts towards tranquility, providing a smooth transition from the hustle and bustle of the day to bedtime. The projectors are an excellent element of the evening routine, helping children to calm down and fall asleep peacefully. They feature a timer that automatically turns off the light, creating a safe, nighttime atmosphere suitable for children.

Tranquil Turtle™

- Soothes the senses of sight and hearing,
- Projects a magical underwater light effect with gentle wave motion,
- Plays calming sounds - an underwater melody and soothing waves,
- The shell glows in relaxing colors,
- Adjustable brightness,
- Automatic shut-off.

Magical, calming light and soothing sounds help lull your child into a blissful sleep. The projector can accompany your little one from their very first days.

Twilight Turtle™

- Projects 8 constellations,
- 3 projection colors,
- Timer control,
- Switch to reactivate the light function.

Helps alleviate fear of the dark.

Twilight Buddies™

- Projects real star constellations,
- Automatic shut-off after 45 minutes,
- Displayed colors: ocean blue, emerald green, and amber,
- Long-lasting LED lights also keep the surface cool.

Light the path to sleep with Twilight Buddies, which have the same calming effect as the award-winning Twilight Turtle.

Dream Buddies™

- Projects real star constellations,
- Automatic shut-off after 45 minutes,
- Displayed colors: ocean blue, emerald green, and amber.

A plush projector that can serve as a night light and help alleviate children's fear of the dark.

Let the fear of the dark become a thing of the past!

Cloud b® cuddly toys are designed to provide children with comfort and a sense of security during sleep.

Cloud b® specializes in creating innovative toys that combine the functions of cuddly toys with additional soothing elements, such as light projections and relaxing sounds. They are ideal for children of various ages, from infants to older kids who need extra support in falling asleep. They can be used both at home and on the go, making them a versatile tool for calming and helping children to sleep.

Smart Sensor: Sound Detector

If the child wakes up, the Smart Sensor sound detector will detect the sound of their cry and automatically play the last melody they heard before falling asleep.

Motion detectors

The motion detectors and smart sensors in Cloud b® toys are examples of using modern technological solutions to improve the functionality and effectiveness of products designed for children. These innovations are especially valued by parents who seek smart solutions to support the daily needs of their little ones.

8 Relaxing Sound Options:

- 4 White Noises:
SLEEP: Mother's heartbeat
CALM: Rain
SLEEP: Ocean waves
RELAX: Whale song
- 4 melodies:
Twinkle-Twinkle / Rockabye Baby / Classical Lullaby / Tranquil Melody

Marko is the exclusive distributor of the Cloud b® brand for the Polish market.
