Price: 39 zł

symbol: MLZ96280

age: 3y-6y

colour: wielokolorowy

total weight of product with package: 0.216kg

EAN: 8413082962807

This game will help children identify the emotions and disclose their feelings. They will find out why we feel happy, sad, surprised, bored, satisfied, angry, disgusted, frightened, etc. Watching Moogy will teach them a little about themselves.

Child develops:

- Empathy & Cooperation
- Hand-eye Coordination
- Spatial Orientation

Developmental intelligences:

1. Emotional journey

Capability of individuals to recognize their own emotions and those of others, discern between different feelings and label them appropriately, use emotional information to guide thinking and behaviour, and manage and/or adjust emotions to adapt environments or achieve one's goals.

2. Emotional Engagement

Capacity to know oneself and know others is an inalienable part of the human condition. Social intelligence is an aggregated measure of self- and social awareness, involved social beliefs and attitudes, and a capacity and appetite to manage complex social change.

3. Logical thinking & Maths

Logical-mathematical intelligence consists of the capacity to carry out mathematical operations, analyse problems logically, and investigate issues scientifically - it involves the ability to detect patterns, reason deductively and think logically.

Moggy - A first real friend in different environments

Emotions are tested out with Moggy - he may be thrown, hugged, hit and kissed. Early parenting skills are practised too, so Moogy may be fed, have their diapers changed, get put to bed, and sit on the potty. By rehearsing these situations, toddlers work through challenges, understand changing expectations, and demonstrate their observations. A child's first real friend!
