Feel to Learn: Nestable sensory tree

Nestable puzzle of tactile and visual sensory stimulation for babies from 12 months. With it, the little ones will enjoy playing while they develop fine motor skills and learn to concentrate, a skill that will be of great help in future stages, through its nestable games.

Babies' curiosity will be triggered, thanks to its contrasting colors and its 6 pieces of different textures in the shape of leaves, fruits and flowers. A game in which they will learn to associate each "shape" with its "hole".

In addition, each sensory piece of this fun toy is made from recycled and recyclable materials, which minimizes its environmental impact.

For curious little ones!

- Game of sensory stimulation (touch and sight) of low age (from 12 months).
- Includes 6 shapes with different textures and contrasting colors.
- Helps develop fine psychomotor skills and associate ""form"" with ""hollow"".
- Game manufactured in Spain in an eco-friendly way, from 95% recycled ABS material + 5% foam and fabrics.
- 100% recyclable.
