## About BeSafe

---

### **Decades of craftsmanship and knowledge**

Our 2023 product line is based on 60 years of experience in making child car seats. Through all these years we've always put children's safety at the centre of everything we do. On this foundation, with decades of knowledge, heart and pride, we create every single detail in all our products to make sure your children are as safe as possible.

The spirit of adventure and wonder is part of our Norwegian DNA, and it's at the heart of everything we do at BeSafe. Established in 1963 by the Norwegian Torgersen family and run by the fourth generation of the founders, our BeSafe family shares the same passion: to ensure you and your children can head out into the world, safely prepared for whatever

comes your way. We are dedicated to developing the safest possible car seats for children of all ages.

**“ Our driving force is the will to protect what is most precious to us: our children. ”**

True craftsmanship and knowledge of both history and authentic family life is an essential part when building for future generations. The result is a 2023 product line with unprecedented safety and comfort, introducing new innovative solutions never seen before – everything to keep your children safe in and outside of the car. Not just in crash tests, but in real life situations.

**From our family, to your family. BeSafe**

## Our BeSafe categories

---

At BeSafe we have both car seats and baby carriers. Our car seats and carriers are divided in stages dependent on the child's age, height and weight.

Please note that the stated age range is just a guideline based on average values and does not limit or guarantee the usage time.

Infant

Toddler

Childhood

**Car seats from birth**

When choosing a seat for your newborn, there are two paths you can choose from: either to use an infant carrier from approx. 0-12 months, followed by a toddler seat or to use a 2-in-1 car seat from newborn to approx. 4 or 7 years.

**Toddler car seats**

If you chose the "classic path" and had an infant carrier before, the toddler car seat is the second car seat for your child. Some seats in this group can be used both rear or forward facing.

**Child car seats**

This is the car seat that your child will use for the longest time – from approx. 4 years until 12 years. Using a high back booster seat instead of only a booster cushion ensures that your child is provided with a side impact protection during the whole period of use.

**Baby carriers**

Our baby carrying category is a relatively new and natural step for us to take with our expertise within safety, comfort and ergonomics. The BeSafe carriers will make your everyday life easier while you get to bond and embrace your love.

*Scan to go online and find the latest news and our full product range*

**Accessories**

Make your and your child's car journey even safer and more peaceful. BeSafe accessories focus on traffic safety for you and your child, as well as design and protection of the car's interior.

## 1 belt - 2 lives

# BeSafe pregnancy belts

A safe and comfortable choice, keeping you and your unborn child protected in the car.

A BeSafe pregnancy belt helps to protect you both in the event of an accident by always positioning the lap belt beneath the baby bump. It does not interfere with the safety performance of the 3-point car belt and is crash-tested for your safety.

### TECHNICAL INFORMATION

**Recommended:** From the second month of pregnancy

**Tested:** ECE R16 (BeSafe Pregnant)

**Installation BeSafe Pregnant:**

Fitting strap

**Installation BeSafe Pregnant iZi FIX:**

Fitting strap or ISOfix\*

\*The BeSafe Pregnant iZi FIX features ISOfix hooks for flexible usage also in the back of the car.

Both carriers has been acknowledged and approved by recognized experts.

NEW

# BeSafe Newborn Haven

Newborn carrier with uncompromising ergonomics.

**Sustainable, soft and durable materials.** It feels like a sling, yet it's very easy and intuitive to use.

**Comfortable design** with cross-straps that distributes the weight evenly.

### TECHNICAL INFORMATION

**Max. weight:** 11 kg  
**Age:** 0-12 months  
**Carrying mode:** The baby carrier can be used on the front, inward facing from approx. 50 cm  
**Approved:** CEN TR 16512 & Acknowledgement by IHDI (International Hip Dysplasia Institute)

**Adjustable positioning**  
Head support and leg support adjustable as the baby grows.

**Special pouch design**  
Allows for a deep sitting position.

# BeSafe Haven™

Carry with comfort. Always. All ways.

**Adjustable 3-way carrier** that will fit you and your growing child for many years

### TECHNICAL INFORMATION

**Max. weight:** 15 kg  
**Carrying mode:** Inward carry: from approx. 55 cm on. Outward carry\*: from approx. 5 months on. Back carry: from approx. 9 months on  
**Approved:** CEN TR 16512 & Acknowledgement by IHDI (International Hip Dysplasia Institute)

\* BeSafe recommends carrying outward facing earliest from approx. 5 months onwards and only for a limited time in calm environments. It is important to interact with the child – that way the child can explore the world in a safe way with a parent close by. Carrying outward facing is “together time”, not “transport time”.

## BeSafe iZi Go Modular X1 i-Size

Can be clicked onto most strollers for flexible usage outside the car.

### TECHNICAL INFORMATION

**Height:** 40 - 75 cm  
**Age:** approx. 0 - 12 months

Metallic Mélange

# iZi Flex FIX i-Size

Our flexible high-back booster seat from 4 to 12 years

## TECHNICAL INFORMATION

**Height:** 100 - 150 cm

**Age:** approx. 4 - 12 years

**Installation:** 3-point vehicle belt or ISOfix

**Direction:** Forward facing

**Approved:** UN R129 (100-135 cm i-Size, 135-150 cm specific vehicle)

**Adjustable headrest**  
Headrest specifically shaped for an improved view and sleeping support.

**Allows for 3 in a row**  
The detachable side bumpers allow for reducing the seat to a width of only 44 cm for enabling fitting up to three people in a row.

**Ensures optimal use**  
Shoulderbelt and lapbelt guiders for optimal belt positioning.

**High comfort** Sitting angle can be adjusted by the child during drive.

## 3 Reasons why you should choose a high-back booster seat

High-back booster or a simple booster cushion? Here are our top 3 reasons why you ALWAYS should choose a booster seat with a high backrest for your child:

- 1. Side impact protection:** a high-back booster always adds protection for your child's torso and head against side impacts.
- 2. Belt positioning:** lockable shoulder belt guiders make sure that the shoulder belt is kept at an optimal height for your growing child.
- 3. Support while sleeping:** the headrest and backrest offer comfort when resting or sleeping while ensuring correct belt positioning during nap time.

Peak Mesh    Anthracite Mesh    Metallic Mélange    Sea Green Mélange    Cloud Mélange    Fresh Black Cab

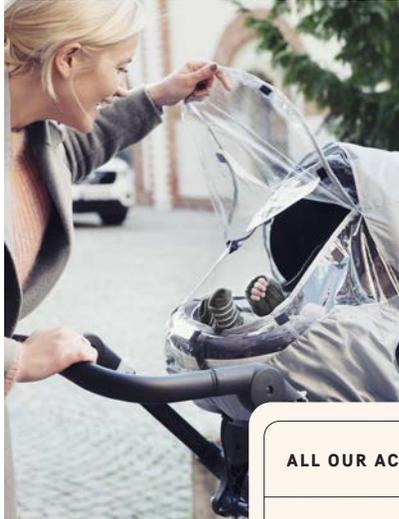

# The perfect add-on: Our accessories

For rear facing journeys and beyond.

## From car to home in one nap: iZi Transfer

Helping you to smoothly transfer your baby from stroller to car seat to home. A perfect match with our 2-in-1 seats.

## Rain Shield

Protects your baby from rain and wind when outside the car.

### Fits with:

BeSafe iZi Go Modular X1 i-Size

## Belt Guard

Keeps the shoulder belts together to prevent little Houdinis from escaping.

**Fits with:** All BeSafe toddler seats.

## Tablet & Seat Cover

## Voksi® products for child car seats

BeSafe's sister company Voksi® offers a wide range of sleeping bags made with the highest quality to give your child the best protection and high comfort during all days of the year.

### Voksi® products for cold days

When it is cold outside, we recommend to use Voksi® Move, a bag with wool and down filling in the baby car seat. The unique design of the back with harness openings ensures easy installation and good adaptation to almost any type of harness. When used in a car seat, Voksi® Move provides the insulation that replaces thick outerwear. In this way, the harness in the car seat can sit closer to the baby's body. Voksi® Move has been crash tested in combination with BeSafe car seats in the recommended rearward facing position.

### Voksi® products for warm days

During the warmer months of the year, you can use Voksi® Sky Light. All sleeping bags that can be used with child car seats are multifunctional and are also suitable for use in the stroller.

The Voksi® Airflow Liner is the perfect accessory in the child car seat during hot days. The Airflow Liner is an inlay in 3D mesh that offers good breathability, is moisture-absorbing and quick-drying. It fits just as well in the stroller, which makes it very universal.

All Voksi products for child car seats are made of carefully selected materials and are certified according to Oeko-Tex® STANDARD 100, Class 1.
