- Large extendable canopy with UPF 50+ protection and ventilation window
- Flip-flop friendly break with traffic light indicator
- Easy one hand recline mechanism
- Wipe clean calf rest
- Removable headrest
- Integrated footrest

### EXPLORE PERFECTION

At egg® we have always been smitten with the smallest of details. That button; this stitch of fabric, those buckle clasps, the treads on that tyre. It's the dozens of tiny individual decisions that make the complete finished product so perfect. After all, everything we do is based on looking after babies, the smallest of people, so every miniscule part is important and makes a difference.

When we had the big idea to create another egg® stroller we asked ourselves how small can we go?

There are lots of tiny strollers available though, so we tweaked the question – how small can we go without compromising the luxury, convenience and safety that the egg brand offers.

The answer is...eggZ®

We started with everything that is loved about our larger egg2® stroller; such as the easy push and smooth ride, the exquisite tailoring of the fabrics, the curves of the chassis. Then we focussed on maintaining the maximum comfort for your precious passenger and the ease of use that has become one of our hallmarks.

Our end result is big stroller features and functionality, in a small package – we are very proud to introduce eggZ® and invite you to explore perfection with us.

### Chassis, Basket & Wheels

A unique curved chassis profile invites the very clever z-fold system that is at the heart of the stroller. A deceptively simple one-hand process using discrete buttons on the hand-stitched handlebar ends with a small freestanding fold. The handlebar area also houses two convenient hooks for hanging your backpack.

The extendable basket offers great length and depth on such a small stroller and can easily fit everything you need for your next expedition or offers more than enough space to bring back the groceries.

Compact puncture free tyres feature a unique egg-shaped tread pattern, with the stroller leaving its mark wherever it goes. Designed for superior handling and the optimum smooth ride, eggZ® has been fitted with puncture free PU tyres as standard. The brake pedal is flip flop friendly with an extra visual 'traffic light' green and red indicator.

### Canopy & Seat

Suitable from birth with a 3-position recline, the eggZ® seat offers a cocoon like environment for baby and a sumptuous sit for toddlers with its soft-touch fabrics and deep padding. A simple one-touch handle recline makes life much easier than the strap recline systems on other strollers, and ease of use is pushed to the max with our ingenious magnetic buckle system on the harness.

The seat canopy features a 'hidden' ventilation net, which can also be used as a viewing window, and is easily extended to offer large coverage with UPF 50+ sun protection.

### Accessories

The egg2® backpack is stylish and practical and made from a matching soft-touch marl fabric and is easy to keep at hand by hanging on the special hooks near the eggZ® handlebar.

Extra luxury and comfort is available to your little passenger with the reversible fur seat liner. Available in a choice of 4 colours, this luxury liner is warm and cosy during winter months and cool during summer.

Further protection against the elements is also available with the rain cover accessory that is included with the stroller.
