

K's Kids Learning Triangle®

Every piece of K's Kids toy is designed for the healthy development of a child. To help parents understand the benefits of our toys to their children, K's Kids has developed a "Learning Triangle" which summarizes what a child needs in his PHYSICAL, COGNITIVE and SOCIAL developments.

Our Learning Triangle provides parents an easily understandable guideline of what kind of developmental skills a child can get from playing with such a toy. The 9 icons, which represent more detailed developmental areas, will explain to parents the details of each of the developmental benefits.

I. Physical Development

Senses

The fundamental senses of seeing, tasting, hearing, smelling & feeling encourage a child's curiosity.

Fine Motor Skills

Fine Motor skills are those smaller actions between the thumb and fingers or using the toes to wriggle and feel the objects.

Gross Motor Skills

Gross motor skills are larger movements involving the arm, leg or feet muscles or the entire body.

Logical Intelligence

Logical training enables babies to make connections between pieces of information.

Creative Intelligence

Colors, shapes, learning how to draw, getting familiar with music and rhythm, all goes to aid the growth of a child's creativity.

Linguistic Intelligence

Linguistic Intelligence is the ability to use sound and language for expression and comprehension of others while a child is developing.

III. Social Development

Emotion

A healthy child should be able to control and express his emotion, and interact effectively with others with mutual trust.

Communication Skills

Good communication skills lead a child to perform cooperative tasks and become productive team members.

Self-Esteem

Self-Esteem is an overall sense of achievement a child feels from the important people around him. Task basis activities could help children to build up a stronger self-esteem with a better judgment about their own worth.

On each of our K's Kids toys, we have indicated, through our Learning Triangle, how your child can benefit from the different developmental aspects that our toys provide for him. **Please visit K's Kids Parents' Support Center for more details.**

Contents

K's Kids is a series of toys specially developed for babies and toddlers. We are committed to making the best toys for young hands and minds. We use high quality and safe materials to produce toys that are adorable, educational and fun to play with. Our original concepts are highly recognized by the toy industry and we have won over 100 world renowned toy awards.

P.6

Popbo Blocs are soft and hard plastic building blocks specifically designed for infants and toddlers. They come in many vibrant colors and are compatible and connectable to one another. The series also consists of animals, vehicles, figurines and more. Popbo Blocs' unique linking system makes it easy for babies to pop the blocks on and off and is a great training tool for their motor skills, eye-hand coordination and creativity.

P.37

Training2s is a subline of an award winning educational products' brand – K's Kids. Some children may need special training in some areas. K's Kids has specially developed a series of toys called Training2s to help children to improve their skills at areas that they are weak at. Parents or teachers can make use of these tools to improve a child's weakness, such as improve eye-hand coordination, sensory integration, body balance, small and big muscles, emotions, logical sequences etc. Training2s is developed by education specialists with professional knowledge.

P.49

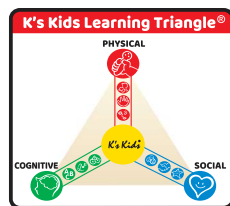

Established since 2001, READ&PLAY is a cloth activity books series created for children's early stages of development from 0 to 5 years old. READ&PLAY activity books are not only books for learning but also books for fun. It covers wide range of children books with colorful illustrations and lots of built-in activities, which aims at arousing children's interests in reading and learning. READ&PLAY activity books are translated into over 20 languages under co-edition.

First Developmental Toys

Start your baby's first learning experience in the physical, cognitive and social development areas through play!

Demo

First Developmental Toys - Value Pack

Stage 1 (0-12M)

KA10774

34cm(W) x 16cm(H) x 6cm(D)

Babies start to learn through their five senses: seeing, touching, smelling, tasting and hearing. A soft chewing pal provides sense of security through oral stimulation and touching. When babies start to babble, a simple soft book can start their linguistic development - listening, understanding and responding.

Stage 2 (12-18M)

KA10775

34cm(W) x 16cm(H) x 8.5cm(D)

At this stage, babies move around to explore new objects. Toys that train gross motor skills are recommended. They are also interested in cause and consequence. More, it is a good time for them to learn about themselves.

Stage 3 (18M+)

KA10776

34cm(W) x 16cm(H) x 6cm(D)

From 18 months, toddlers have stronger fine motor skills, they can turn, twist, and rotate. They start to doodle and say simple words or phrases. Strengthen their different skills through fun little toys.

First Developmental Toys - Dumpbin Set

45cm(W) x 151cm(H) x 30cm(D)

0-12M Stage 1

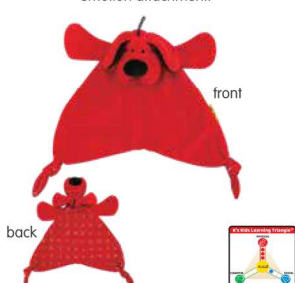

Sensory Stick
KA10762
13.5cm(W) x 14cm(H)
Stimulate baby's senses through seeing, touching, hearing and teething.

Baby's First Words
KA10766
13.5cm(W) x 13.5cm(H)
Read with your baby and stimulate their first word.

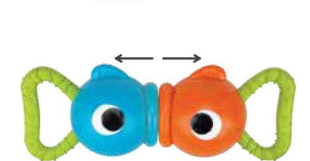

Baby Blanky
KA10761
38cm(W) x 38cm(H) x 6.5cm(D)
The first soft pampering toy for emotion attachment.

12-18M Stage 2

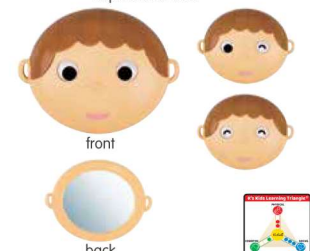

Kiss me Fish
KA10764
17.5cm(W) x 7cm(H) x 5.5cm(D)
The act of pulling strengthens arm muscle.

Feed the Whale
KA10767
Whale: 10cm(W) x 7.5cm(H) x 14cm(D)
Shapes: 5cm(W) x 5cm(H)
Time for learning shapes. Repeat action learns cause and effect too.

My Face
KA10763
14cm(W) x 11cm(H)
Baby understands self-image through mirrors. Can learn emotions through eye expressions too.

18M+ Stage 3

Turn and Twist Horse
KA10768
16cm(W) x 14cm(H)
Twist and turn with fingers and hand.

Mini Doodle Studio
KA10769
15.5cm(W) x 15cm(H)
Drawing is fun and imaginative.

Blow the Birdy
KA10765
13cm(W) x 12cm(H)
Blowing strengthens cheek muscle - the first step to speak.

Listen, Clap & Sing

KA10664

12cm(W) x 12cm(H) x 12cm(D)

★ 3 modes total 15 songs

Your child can become a little musician with the Listen, Clap & Sing musical cube! This is the best tool to develop babies' early sense of music and rhythm. The cube can be set in three different modes: listen, clap and sing. When children toss the cube in "listen" mode, the cube plays melodies in different instruments based on the side facing up. In the "clap" mode, three melodies with different beats are played, encouraging your child to clap along. In the "sing" mode, six funny songs are sung by different animals and people, encouraging your child to sing along!

Day N Night Owl Clock

KA10662

35cm(W) x 23cm(H) x 13cm(D)

Tick tock, tick tock! What's the time on the clock? Teach baby the concept of day and night, teach them how numbers are related to different time of the day. Pull the two handles together to activate the tick tock sound, pull again, now it plays music. A good training for gross motor skills and for understanding Cause and Effect. For younger baby, encourage him to use his little fingers to turn the clock hands and the clicking nose. Excellent tool for fine motor training.

Calming Shoulder Pad

KT21001
Size: 26(W) x 42(H) cm
Weight: 0.78kgs (1.72lbs)

Improve focus and concentration

Some children may be easily distracted by the external environment. They find it hard to focus and concentrate during study. This may be because of a sensory processing problem. A weighted shoulder pad can improve the situation or even solve the problem.

Put the weighted pad on your child's shoulders. This can enhance his proprioception and increase the awareness of the position of his body. It can improve sensory processing and concentration. It can also give your child a sense of security, help him stay calm and reduce anxiety.

Calming Lap Pad (small)

KT21002
Size: 22(W) x 60(H) cm
Weight: 1.36kgs (3lbs)

Calming Lap Pad (large)

KT21003
Size: 25(W) x 70(H) cm
Weight: 2.27kgs (5lbs)

Improve focus and concentration

Some children may be easily distracted by the external environment. They find it hard to focus and concentrate during study. This may be because of a sensory processing problem. Weighted lap pads can improve the situation or even solve the problem.

The lap pads are designed for children who have trouble sitting still. Put the weighted pads on your child's thighs. This can enhance his proprioception and increase the awareness of the position of his body. It can improve sensory processing and concentration. It can also give your child a sense of security, help him to stay calm and reduce anxiety.

Sensory Balls (2pcs)

KT21004
Size: 6cm (diameter)
2pcs/set, random colors

Strengthen hand muscles and sensory development

Some children's tactile sensation may be distressed by seemingly normal touches and easily get upset. Gripping the sensory ball can erase children's sensory integration disorder problems by stimulating their sense of touch. It can also help release their anxiety. The sensory ball can be used for squeezing and massaging, which can in turn strengthen children's hand muscles and train their fine motor skills.

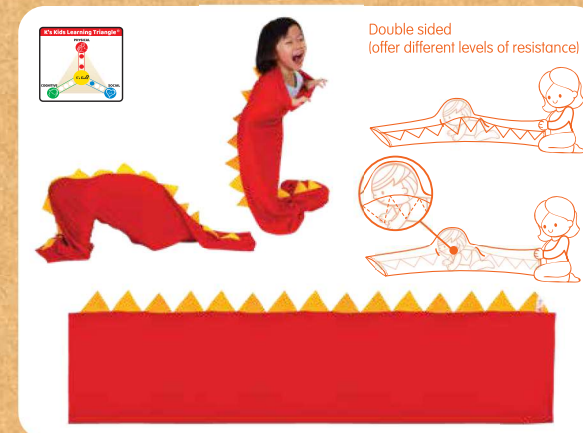

Resistance Tunnel

KT21005
Size: 39(W) x 180(L) cm

Develop body awareness and motor planning. Provide proprioceptive input

The vestibular system is important for children's balance and control of body postures. Let children crawl through the Resistance Tunnel to strengthen their arms and legs. The Resistance Tunnel is made of elastic fabric, so it wraps itself around children's bodies while they are crawling. There are also different textures inside the tunnel to stimulate children's senses. This training tool allows children to experience varying degrees of resistance and deep-touch input. It also reduces sensory and tactile defensiveness.

Touch N Feel Shapes

KT21023
Size:
Triangle: 6(W) x 5(H) x 1.5(D) cm
Rectangle: 9.5(W) x 3(H) x 1.5(D) cm
Circle: 5 (W) x 5(H) x 1.5 (D) cm
Includes: 15 sensory pads, 1 storage/guess bag, 15 game cards, 1 guide book
(Triangle, Rectangle, Circle – each 5pcs in 5 different fabrics)

Provide tactile stimulations. Strengthen sensory development

Touch N Feel Shapes comes with 15 sensory pads (5sets x 3shapes), 1 storage/guess bag, 15 game cards and 1 guide book. The sensory pads are made of 5 different fabrics to provide different tactile stimulations. Start to familiarize the child to touch the pads and understand the different textures. Then put pads into the bag. Ask child to pick a game card and use their hands to poke into the bag to find the right one. Parents can start with two groups of shapes and gradually increase the level of difficulty.

Sensory Marble Maze

KT21022
Size:
Lizard: 33cm x 16cm
Owl: 22.3cm x 22cm
Fish: 18cm x 20cm
Includes: 3pcs/set (Lizard, Owl, Fish - each 1 pc)

Strengthen finger muscle and sensory development. Improve focus and concentration

Babies learn through senses. They are relying on touch or tactile sense to experience the world. The Sensory Marble Maze features 3 soft mazes, each filled with 1 marble. Children need to use their fingers to push forward the marble along the twisting path till they reached the other end. Such action will reinforce children's finger muscle, eye-hand coordination, improve their focus and concentration. This toy is also useful for children with tactile defectiveness as the continuous tactile input will help desensitize their tactile senses.

Balance Cushion

KT21019

Size: 35cm (diameter)

Train balancing. Strengthen muscle tone. Keep emotional stability

Balance Cushion is a sensory integration training tool. It can help to improve a child's body balancing skill. Child needs to stand on the Balance Cushion to keep himself balance on it, this can help to develop motor planning* and coordination.

* Motor planning is to use the brain to direct the body to perform goal-directed motor tasks.

Throw N Hit

KT21029

Size:

Target mat: 50(W) x 60(H) cm

Beanbag: 9(W) x 9(H) x 3(D) cm

Includes: 1 target mat, 4 beanbags

Train gross motor skills and balancing. Keep emotional stability

Gross motor skills are essential to help children strengthen their big muscles and perform body activities, like standing, sitting, walking and running etc. Throw N Hit is a very useful and playful indoor training tool to develop gross motors. Hang the target mat onto a sturdy and stable place such as the wall or a door. Then, toss the beanbags to the matching color area. This game enhances body balancing, big muscles built-up and perfect body posture. It can also help release children's anxiety and anger to keep them emotionally stable.

Press n Go Inchworm

KT21007

Size: 8(W) x 10.5(H) x 22(D) cm

Enhance fine and gross motor skills. Reinforce proprioception by crawling

Movement coordination and fine motor skills are both related to proprioception, which are important in our daily life. The Press n Go Inchworm can enhance children's fine and gross motor skills. When children press the body of the inchworm, it will move forward. This encourages children to crawl after the inchworm, reinforces children's eye-hand coordination and concentration.

Sea Creature Chains

KT21006

Size:

Star: 5.4(W) x 7.2(H) x 2.6(D) cm

Octopus: 6(W) x 7.6(H) x 6(D) cm

Fish: 4.2(W) x 7.7(H) x 4.2(D) cm

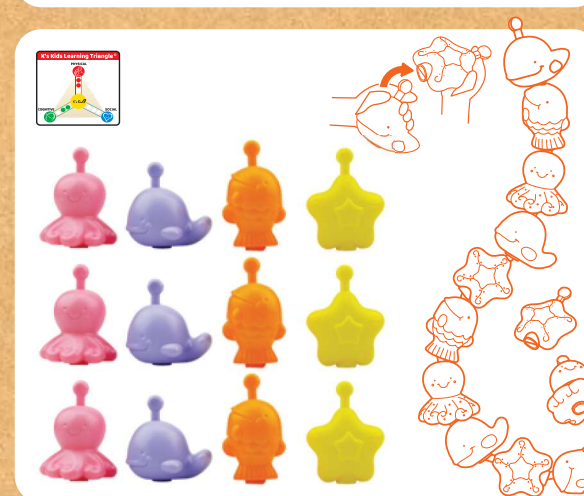

Whale: 5.6(W) x 6.5(H) x 6.4(D) cm

Includes: 12pcs/set

(Star, Octopus, Fish, Whale – each 3pcs)

Reinforce motor skills and logical thinking

Fine motor training exercise can improve children's proprioception and physical coordination. Sea Creature Chains is a training tool to reinforce motor skills, eye-hand coordination, focus and concentration. Sea Creature Chains can also train children's little fingers and wrists to squeeze, press and grip. This training tool can develop children's logical thinking skills and help them understand the concept of top and bottom and sequence. A sense of color can also be developed through this training.

Pop Lock Stacking Squares

KT21024

Size: 6.5(W) x 6.5(H) x 2(D) cm

Includes: 10 stacking squares

Reinforce motor skills and eye-hand coordination. Develop logical thinking

A set of 10 Pop Lock Stacking Squares can help strengthen fine and gross motor skills and eye-hand coordination. When children pull-apart and pop-together the stacking squares, it helps building big and small muscles. Also, it trains eye-hand coordination when they stack the squares on one another. In addition, children can learn colors and numbers while playing with this training tool.

Clip N Sort

KT21018
Clipping stick size: 24.5(L) cm
Red Cup size: 9.7cm (diameter)
Includes: 6 cups, 50 plastic bones in 5 colors,
1 clipping stick

Clipping Stick

KT21020
Clipping stick size: 24.5(L) cm

Reinforce eye-hand coordination, fine motor skill and concentration. Develop logical thinking

With this toy a child should be able to train their fine motor skill through gripping. With good use of their two fingers, encourage the child to use the stick to clip the bones into the matching color bowls.

Colorful Snapping Chain

KT21025
Size: 20(W) x 2.6(H) cm
Includes: 18 snapping straps, 1 guide book

Reinforce fine motor skills. Develop spatial awareness

A set of 18 colorful snapping straps can give children loads of fun and learning experience. Through snapping and unsnapping these colorful straps, children can develop their hand muscles and fine motor skills. The snapping action and sound also release a child's emotional tension. Come with a guide with play patterns for children to follow. They can also build their own pattern. It is a good game for establishing spatial awareness.

Lacing Fun

KT21017
Bone size: 2(W) x 1(H) x 1.3(D) cm
Includes: 2 shoelaces, 100 plastic bones in 5 colors

Reinforce eye-hand coordination, fine motor skills and concentration. Develop logical thinking

Lacing Fun can help to strengthen fine motor coordination, motor planning and eye-hand coordination. This training helps to build the strength of small muscles of the hand when children use their thumbs and forefingers to do the lacing. Children can learn color sorting with different colors of bones. They can do the lacing by the given sequences. These trainings can help to develop their logical thinking.

Wind Up Emma

KT21008
Emma Size: 6.7(W) x 7(H) x 6.7(D) cm
Includes: 1 Emma, 4 different keys

Enhance gross and fine motor skills

Wind up Emma comes with a walking chicken and four keys. This toy is specially designed to train the fine movements of fingers. Key 1 is for thumb and forefinger. Key 2 is for first three fingers and preparation for writing. Key 3 is for wrist and arm movements. Key 4 is for fine movements of first three fingers. Select any one key and wind up Emma, put her into any one cover of the box and let her walk until she stops on an instruction picture printed. Follow that instruction picture to perform the action. Then change to the indicated key and wind her up with the requested number of twists. And the game continues. Apart from intensive finger fine motor training through wind up exercise, the game also provides gross motor training and logical thinking. Finger fine motor training improves writing skills and daily self-care abilities.

Peg N Lace

KT21026
Size:
Pegboard: 24.8(W) x 24.8(H) x 3(D) cm
Game card: 23(W) x 23(H) cm
Fish-shaped peg: 4.5(W) x 4(H) cm
Includes: 1 pegboard, 12 fish-shaped pegs,
9 game cards, 2 lacing strings

Reinforce fine motor skills and eye-hand coordination. Develop color concept and visual discrimination skills

Finger muscle training is essential for children to develop writing skills. Peg N Lace comes with a pegboard, 12 colorful fish-shaped pegs, 9 game cards of different skill levels and 2 lacing strings. First, child should place a game card on the pegboard. Then, put the pegs into holes of matching colors. Finally, lace the pegs one by one according to the given sequences. Child can start from the easiest and move upwards. The game can help strengthen fine motor skills, eye-hand coordination, color concept and built up visual discrimination skills.

Doodle Studio plus

KT21009

Size: 30(W) x 30(H) cm

Includes: 1 magnet doodle pad, 1 magnetic pen, 12 matching learning cards, 12 shapes learning cards, 4 spatial training cards, 1 drawing booklet, 1 guide book

Enhance fine motor and writing skills.

Reinforce logical thinking

Sometimes children have problems with writing within a defined space. Doodle Studio plus can help solve this problem. In addition to all the learning elements of the original Doodle Studio, there are 4 spatial training cards provided to help children understand position, direction and distance – very useful training tools for pre-writing skills. Child is asked to draw within the lines drawn by the parents. Parents can adjust the width of the space according to their progress.

More learning can be found on the guide book.

My Singing Birthday Cake

KT21016

Size: 9.5(W) x 21(H) x 9.5(D) cm

Train oral motor. Develop logical skills.

Enhance eye-hand coordination

Take out the magic wand. Press the button with the finger to light up the star. Continue pressing the button to let the star grow and light up the 6 candles on the birthday cake. This trains fine muscles as well as eye-hand coordination. When all the candles light up, there will be the birthday song. This trains cause and consequence. With their mouth, child blows out the candles one by one. This is oral muscle training. Then comes the clapping sound, another example of cause and consequence.

Oral Muscle Teether

KT21015

Size: 7.6(W) x 10.6(H) x 1.4(D) cm

Train mouth and jaw muscles.

Improve drooling and swallowing problems

Mouth muscles are closely related to the skill of speech and articulation. The normal swallowing action requires coordination of jaws and tongue. This Oral Muscle Teether can increase the movement in the cheek, tongue, lips and jaws, prevent the problem of drooling and swallowing. Product is designed in a b-shape, the length of which enables deep reach to upper and lower back molars. Rough texture on the surface of the teether can help to stimulate the child's lips and tongue, which

Blow and Blow

KT21014

Size: 23(W) x 23(H) cm

Includes: 5 cardboards (double-sided), 5 plastic bones

Train oral motor and fine motor skills.

Enhance emotional stability

Mouth muscles are closely related to the skill of speech and articulation. Blow and Blow is a training tool to strengthen a child's jaw muscles. Child needs to blow the plastic bones from the starting point to the end point on the cardboards. Level of training can be adjusted by arranging different patterns of blow tracks and/or adding more bones. Child needs to control the intensity of blowing to make sure the bones are on the track. This training can enhance child's motor skill and speech development. On the other hand, deep breathing in between blows can let the child express his emotion and reduce his anxiety.

Story Blocks

KT21013

Size: 8(W) x 8(H) x 8(D) cm

Includes: 4 soft blocks, 18 stories, 1 guide book

Enhance logical thinking.

Improve communication skill

Story telling is essential for a child to learn logical thinking and communication skill. First, parents should place story cards in the blocks and let the child arrange the story in the right order. This process leads the child to think in logical sequence. Through asking questions from the guide book, parents can lead the child to complete a full story. Such training can improve a child's communication skill.

My Picture Diary

KT21027

Size: 31.5(W) x 37.2(H) cm

Includes: 1 diary board, 20 daily activity cards,
6 weather cards

**Develop organization and sequencing.
Improve language skills**

My Picture Diary helps children develop organization, sequencing and language skills. Children can organize their own diary using 20 daily activity cards. Select the planned activities and put the cards into pockets according to the sequence. It helps children understand what to do and what will come next. Parents can lead the children to describe what they have done. Such training can improve children's communication and language skills.

My Feelings

KT21010

Size: 31.8(W) x 44.5(H) cm

Includes: 1 My feelings learning board,
1 My Feelings booklet (36 pages)

**Understand different feelings and
express appropriate reactions. Develop
social interaction skills**

My Feelings helps children identify emotional states both in themselves and others. 36 scenarios pictured on My Feelings booklet help children understand feelings and reactions to different situations. Child can imitate different expressions in the mirror so they can recognize their own expressions. Parents can take photos of their children's different facial expressions and then put them onto My Feelings learning board. Then children can review their own facial expressions. This training helps children develop their social interaction skills.

Look At Me!

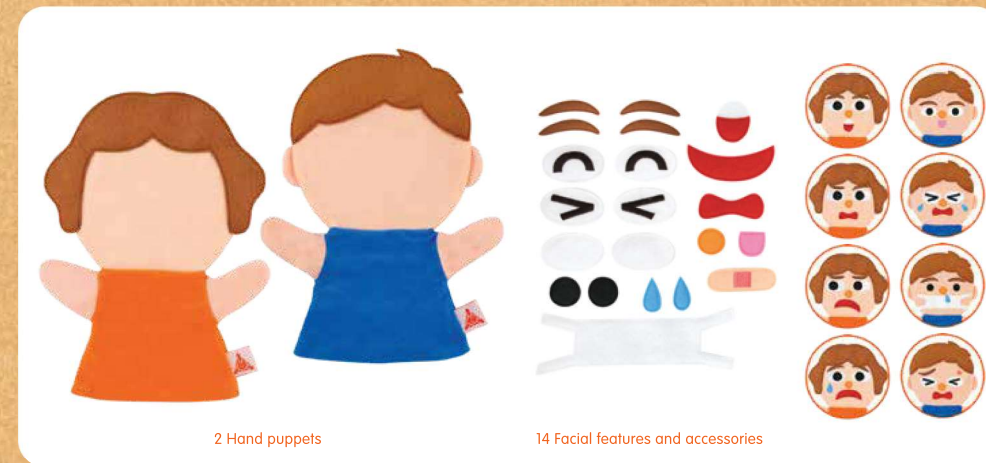

KT21028

Size: 22(W) x 16.5(H) cm

Includes: 2 hand puppets, 14 facial features and accessories

**Understand different expressions and
feelings. Encourage eye contact and
communication**

Some children may have difficulties in neither expressing their feelings nor understanding others' feelings. These children normally will avoid direct eye contact with others. It is difficult for them to process the information received through normal eye contacts. This toy is designed to help children to familiarize the relationship between eye expressions with feelings. It comes with two hand puppets and different facial features and accessories. Parents can place eyes, mouths and eyebrows in different positions to show different emotions and help children understand them. This training helps children develop social interaction skills.

2 in 1 Dress Up Doll

KT21011

Size: 22(W) x 55(H) x 4(D) cm

Train fine motor skills. Enhance the ability of self-care and self-confidence

Learning dressing skills can enhance self-care ability, establish good habits and develop a sense of responsibility and self-confidence. Children can practice zipping, tying and buttoning with 2 in 1 Dress Up Doll. Buttons are designed in two sizes which can be used to practice in different levels of difficulty. Size of buttons is designated for child, which can make the dressing training simpler and easier, boost his self-confidence. Dressing skills enable precision movements, train fine motor skills and eye-hand coordination.

Healthy Diet

KT21012

Puppet size: 18(W) x 30(H) x 11(D) cm

Includes: 1 hand puppet, 34 food cards, 1 food pyramid card

Understand different kinds of food. Improve the problem of picky eating

Most children have the problem of picky eating and resist certain types of food. Healthy Diet comes with a hand puppet and 34 food cards. Parents can show how the puppet enjoys all different kinds of good food and the value of these foods. There is a food pyramid card which teaches children the right portion of food to be taken. It is a nice piece of toy to teach healthy eating.

READ & PLAY™
a K's Kids® production

READ&PLAY is a cloth activity books series created for children's early stages of development from 0 to 5 years old. READ&PLAY activity books are not only books for learning but also books for fun. It covers a wide range of children books with colorful illustrations and lots of built-in activities, which aims at arousing children's interests in reading and learning.

One Beautiful Butterfly
